NEO Container safety information (EN)

Doussard (France), January 15, 2018

The handle of the external NEO Container can loose the connexion with its pin (plastic rod). The problem may happen after several month or year of use.

To solve this problem, NEO is replacing all rescue handles of the NEO Container delivered.
The original handle, on the left, is replaced by this new one, on the right :

Thanks to contact your dealer to get your rescue container handle replacement:
